The Thoroughfare Plan shall present findings and recommendations of a technical study designed for development of a thoroughfare plan for the County through the years 2050, and ultimate growth, and shall include, but not be limited to, the following:

- 2.1 A County-wide plan for a transportation network that reflects current conditions, anticipates future growth and local, national, and international economic conditions and recommends innovative solutions to transportation needs.
- 2.2 Provisions for necessary coordination among Federal, State, Regional, County and local agencies, the Grayson County Regional Mobility Authority, and individual communities within the County for the development of a comprehensive thoroughfare network.
- 2.3 Develop geometric design standards and roadway cross sections that can be utilized by engineers designing roadways in the County, and for determining right-of-way needs.
- 2.4 Produce the documents necessary to modify/create development regulations adopting the Thoroughfare Plan, geometric design standards, and roadway cross sections for the County and individual communities within the County.
- 2.5 Provide cost estimates for critical roadways and identify possible funding sources.
- 2.6 Update the MPO Travel Demand Model (TDM). The TDM is being developed cooperatively in a collaborative manner by the MPO and TxDOT – Transportation Planning and Programming (TxDOT-TPP). The model has a 2013 base year and a 2050 forecast year. Interim years of the model are 2018, 2023, 2028 and 2045. During the development of the model, the MPO is responsible for the socioeconomic data gathering and network coding. TxDOT-TPP is responsible for trip generation, trip distribution, trip assignment and model validation. The travel demand modeling area includes the County. The MPO utilizes ArcGIS, TransCad and Microsoft Excel.
  - 2.6.1 Update the **Base Year Model**. Kimley-Horn and Associates, Inc. prepared the 2008 socioeconomic data for a portion of the County. This data can be provided upon request. The consultant will compile, verify and allocate employment (basic, service, retail, educational) and special generator employment data to traffic analysis zones (TAZ) for **the entire County**. Services to be provided consist of quality checks and quality assurances of the 2013 base year socioeconomic data assigned to the TAZ; and assisting with several base year tasks that are needed to finalize the base year model.

The 2010 population data will need to be collected and allocated to the TAZ by the consultant. Allocating the growth of 2010 population, household size and median income to the year 2013 will be required. A regional distribution table of household income by household size for the base year is required. Daytime population for the 2013 base year allocated to the TAZ will be required.

The 2013 employment data categorized by type (basic, retail, service, educational), special generator employment and special generator population will need to be collected and allocated to the TAZ.

Specific tasks for the base year project are listed below:

- Allocate the 2010 population, number of households, household size, and median income socioeconomic data to the TAZ.
- Calculate the growth from 2010 to 2013 for population, number of households, household size, and median income data previously allocated by TAZ. The source of the 2010 data is from the U.S. Census.
- Allocate the 2013 employment data set, gathered from Texas Workforce Commission data to TAZ.
- Calculate 2013 daytime population and allocate to the TAZ.
- Create a Regional Distribution table of households by household size for the base year 2013.
- Develop the network coding for the 2013 base year.
- Create socioeconomic data maps for the TAC's review and analysis.
- Assist with the presentation of the 2013 model data set to the TAC, as needed.
- TransCad software orientation and basic training in Sherman for MPO staff.
- After TxDOT-TPP performs model calibration model validation, and returns the completed base year model to the MPO, perform TransCad model review and analysis.

The finalized 2013 base year socioeconomic data set, coding of the 2013 network and a 2013 regional distribution table are due to TxDOT-TPP **as soon as possible**. Currently, it is unknown when TxDOT-TPP will complete calibration and validation process in order to return a completed, base year model to the MPO.

The consultant should ensure that the work described herein is included in their proposed work program, but other tasks may be included if the consultant believes they are appropriate and justified.

2.6.2 Develop socioeconomic data for the forecast years of 2018, 2023, 2028, 2045 and 2050. The socioeconomic data types are population, number of households, household size, median income, employment (basic, service, retail, educational) and special generator employment. Services to be provided are the growth allocation of socioeconomic data to the TAZ level.

- Create control totals for the socioeconomic data types for all forecast years.
- Calculate daytime population by TAZ for all forecast years.
- Conduct charrette workshops to assist with allocating growth to TAZ districts and, subsequently to TAZ.
- Utilize ArcGIS, TransCad and Excel during the project.
- Provide the network coding for each forecast year.
- Provide a technical documentation that details the technical methods and processes

used during the forecast project.

- Presentation to the TAC, two (2) meetings and MPO Policy Board (1) meeting.
- TransCad software orientation and basic training in Sherman for MPO staff.

Consultants should ensure that the work described herein is included in their proposed work program, but other tasks may be included if the consultant believes they are appropriate and justified.

The finalized socioeconomic data set of interim years (2018, 2023, 2028 and 2045) and a forecast year of 2050, network coding, a regional distribution table of households by household size are due to TxDOT-TPP **as soon as possible**.

3. Company has failed to make payment promptly to subcontractors or consultants or other third parties used by Company in connection with Company's Services or other work hereunder for which the MPO has made payment to Company; or

4. If MPO, in its good faith judgment and after consultation with Company, determines that the portion of the compensation then remaining unpaid will not be sufficient to complete the Company's Services or other work under this Agreement, no additional payments will be due Company hereunder unless and until Company performs a sufficient portion of its Services so that such portion of the compensation remaining unpaid is determined by MPO to be sufficient to complete the Company's Services or other work.

C. Upon complete performance of this Agreement by Company and final approval and acceptance of Company's Services by MPO, MPO will make final payment to Company of the balance due under this Agreement within thirty (30) days of the following month after final payment for such Services has been billed by Company.

D. MPO may deduct from any amounts due or to become due to Company any sum or sums owing by Company to MPO. In the event of any breach by Company of any provision

or obligation of this Agreement, or in the event of the assertion by other parties of any claim or lien against MPO, or the MPO's premises or property, arising out of Company's performance of this Agreement, MPO shall have the right to retain out of any payments due or to become due to Company an amount sufficient to completely protect the MPO from any and all loss, damage or expense there from, until the breach, claim or lien has been satisfactorily remedied or adjusted by the Company.

E. Company shall not be entitled to any compensation for any Services or work not actually performed or for any lost profits as a result of any abandonment or suspension of any Services or other work by the MPO.

## **ARTICLE IV**

B. In the event Company's performance of this Agreement is delayed or interfered with by acts of the MPO or others, Company may request an extension of time for the performance of same as hereinafter provided, but shall not be entitled to any increase in fee or price, or to damages or additional compensation as a consequence of such delays.

## **Attachment A**

C. No allowance of any extension of time, for any cause whatsoever, shall be claimed by or made to the Company, unless Company shall have made written request upon MPO for such extension within forty-eight (48) hours after the cause for such extension occurred, and unless MPO and Company have agreed in writing upon the allowance of additional time to be made.

Company, after completion of the Services and final payment, agrees to furnish the originals of all such instruments of service to the MPO (or, if this Agreement is terminated or the project for which the Services are being provided is abandoned prior to such completion, Company shall provide the originals of all such instruments of service (whether finished or unfinished) to the MPO upon such termination or abandonment and the payment of any amounts then due the Company pursuant to this Agreement).

D. All documents or other instruments of service supplied by or on behalf of Company to MPO as provided herein shall be in Microsoft Word 2003 or compatible with Microsoft Word 2003.

In the event of such suspension or termination, payment to the Company, in accordance with the terms of this Agreement, will be made on the basis of Services reasonably determined by MPO to be satisfactorily performed prior to the date of suspension or termination.
